## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 1 and 22 are generic to the following disclosed patentably distinct species:

Species 1: Figures 1-2

Species 2: Figures 3-6

Species 3: Figures 7-10.

The species are independent or distinct because:

Species 1: requires a press member which moves in a transverse direction from a first position to a second position over a recessed portion of the substrate wherein the second position allows the sheet to be deflected and thereby determined.

Species 2: requires a press member holding means which rotates to bring a spring biased press member into contact with the recessed portion of the substrate which allows the sheet to be deflected and thereby determined.

Species 3 requires a lower roller with a recessed portion wherein it is the turning of the lower roller to present the recessed portion to press roller which allows the sheet to be deflected and thereby determined.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is

Art Unit: 3653

allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
